TITLE SELECT

ROM ORGANIZER

KEEP / SELECT / PLAY

GREAT COLLECTIONS. READY TO PLAY.

Well kept. Ready to play.

Preserve source sets. Build the library you want to play.

01 KEEP

▶ 02 SELECT

03 PLAY

ARCADE / CONSOLE

HANDHELD / BEYOND

02 / THE IDEA

KEEP THE HISTORY. CHOOSE WHAT PLAYS.

Title Select puts the choice of game titles and releases at the heart of the collection: preserving source sets and deriving a library built for play.

01 / KEEP

Preserve the source

Maintain provenance, variants and integrity. Make checks and uncertainty visible.

02 / SELECT

Explain the choice

Choose releases through explicit region, language and revision rules. Show the reason.

03 / PLAY

Build a useful library

Produce coherent output for a device or purpose, with every required file included.

PERSONALITY

Confident in presentation. Meticulous in operation. Enthusiastic about games, respectful of the collection and clear about every decision.

NAME AND SIGNATURE

Use Title Select in prose, TITLE SELECT in the logo, and ROM organizer as the descriptor. Product signature: Well kept. Ready to play.

03 / LOGO AND ICON

A CLASSIC MENU, MADE INTO A MARK.

Three menu bars retain the full set. A cursor and brackets identify one choice. A solid cobalt wordmark balances a three-color selector across arcade, console and handheld collections.

PRIMARY LOCKUP

SIMPLIFIED ICON

CLEAR SPACE

Leave at least one menu-bar thickness clear around the visible artwork. Keep the symbol and wordmark together.

SCALE

Primary lockup: 180 CSS px minimum. Use the simplified icon at 32 px or larger; its corner brackets are omitted.

COLOR

Cobalt bars and brackets. Red selected bar. Yellow cursor. Cobalt wordmark. Use a light plaque on dark surfaces.

Color and single-color PNGs are included. Use single-color at small sizes. Lettering is artwork; vector masters remain a production refinement.

04 / COLOR SYSTEM

COBALT LEADS. YELLOW SELECTS.

Cobalt leads. Red marks the chosen bar in the emblem; yellow marks the cursor. In working views, blue indicates selection and red is reserved for errors.

Cobalt	Signal red	Select yellow	Carbon	Paper	Cool grey
#1847D1	#D62F29	#F3CF3B	#171A22	#F5F1E8	#D8DCE3
Brand / action	Mark / campaign	Cursor / highlight	Text / frames	Working canvas	Secondary surface

PRODUCT STATES / ALWAYS LABEL THEM

Verified	Matched a named reference.
Needs review	A check or decision is unresolved.
Failed	A check or operation failed.

PAIRINGS

White on Cobalt. Carbon on Paper. Carbon on Yellow. Use pale blue and a blue edge for selected rows in dense tables.

Color supports the label. Selected and Verified are different states.

05 / TYPE AND GRAPHIC LANGUAGE

GAME-MENU RHYTHM. MODERN LEGIBILITY.

CAMPAIGN / LIBERATION SANS NARROW BOLD ITALIC

READY TO PLAY.

Large, short uppercase headlines. Forward lean and clear hierarchy. Keep the main wordmark smooth, not pixelated.

WORKING TYPE / LIBERATION SANS

Every choice, explained.

Sentence case for navigation and game titles. Liberation Mono for data. Pixel lettering is an occasional campaign accent only.

32/38 20/26 14/20 12/16

TITLE / SECTION / BODY / METADATA

01 / PACKAGING GRID

Use as an edge or an empty background field.

01 KEEP

▶ 02 SELECT

03 PLAY

02 / SELECTOR RHYTHM

03 / SOLID OFFSET

KEEP. SELECT.

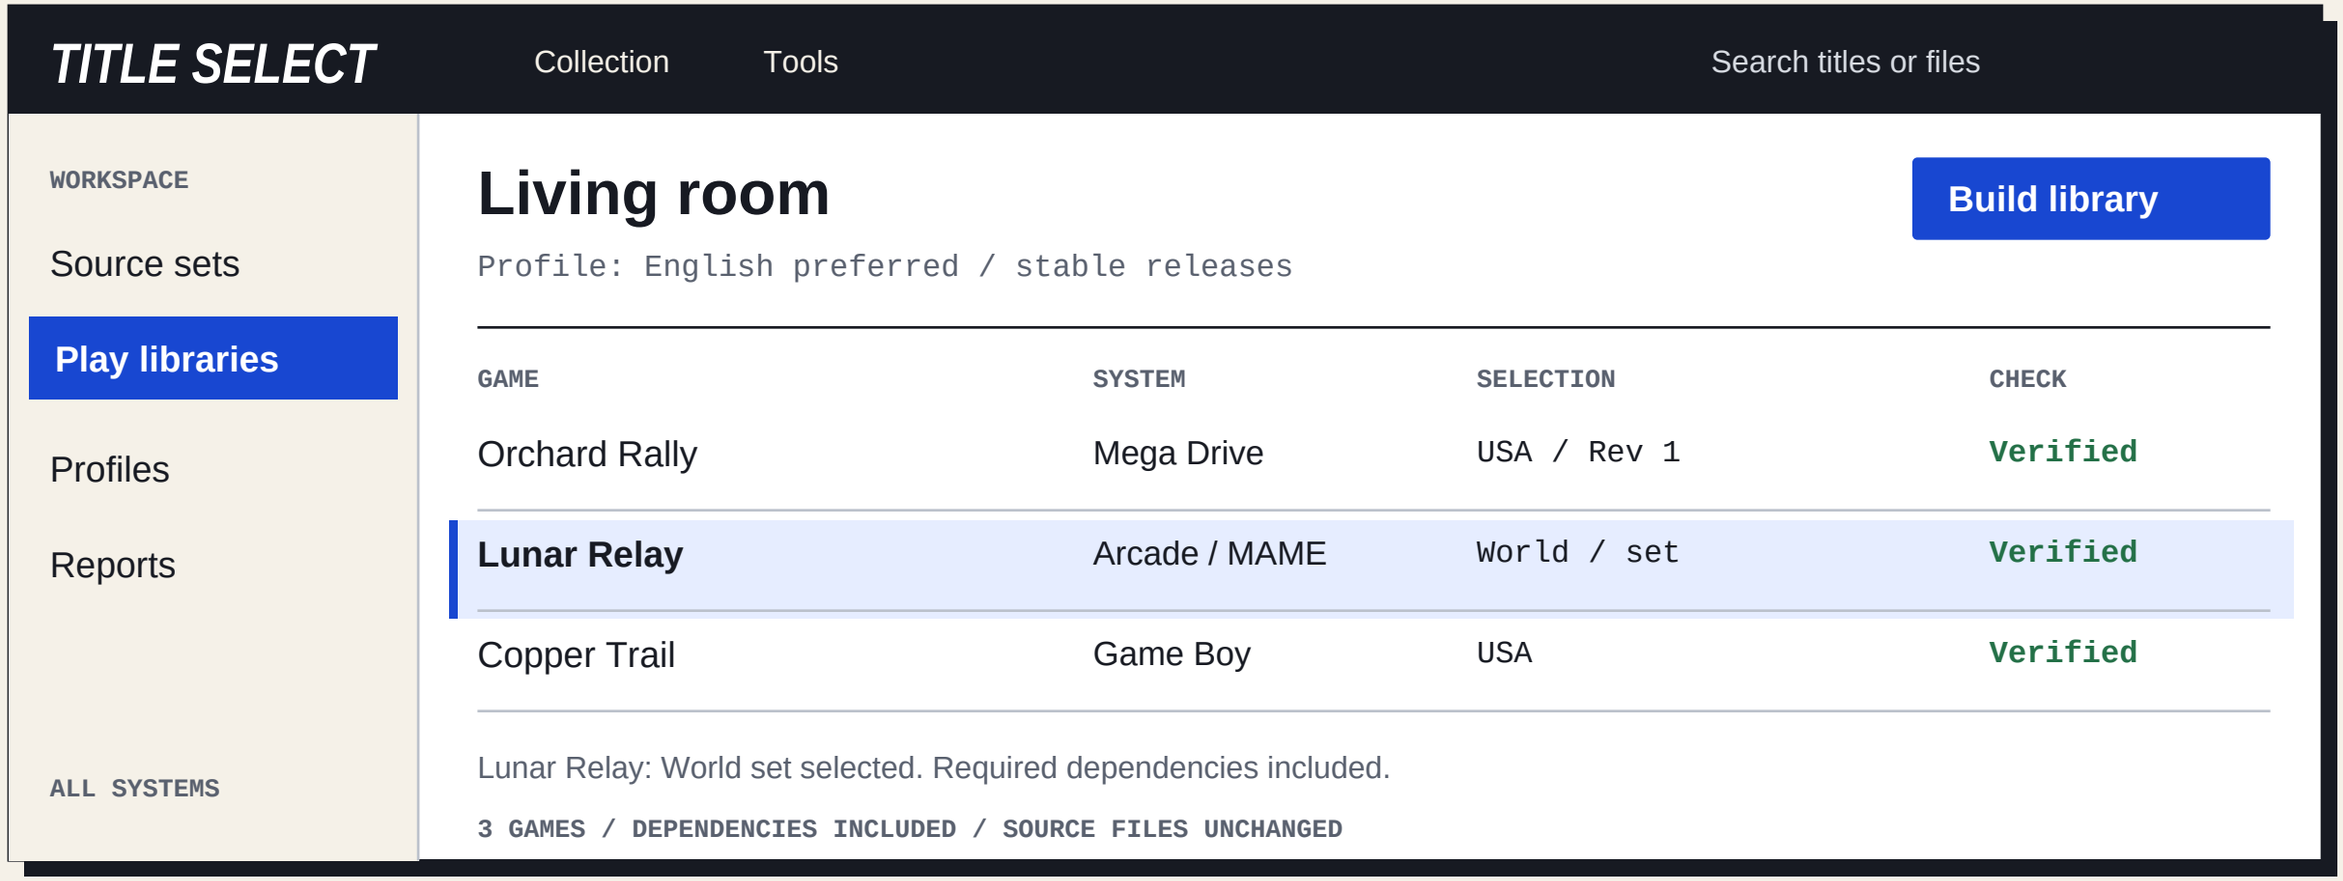

PLAY.

Use one strong motif per composition. In working views: 2 px corners, 40 px rows, flat controls and visible keyboard focus.

06 / INTERFACE CONCEPT

A CLEAR PATH FROM SOURCE TO SELECTION.

Arcade, console and handheld selections share one workflow, with system-specific files and dependencies kept visible.

Proposed interface. Fictional titles and illustrative counts.

NAVIGATION

Keyboard access; visible focus; discoverable details.

FEEDBACK

120-160 ms transitions; honor reduced motion.

PRIORITY

Integrity, review items and chosen games come first.

07 / CAMPAIGN TREATMENT

GIVE A GREAT COLLECTION A NEXT STEP.

A launch banner combines marquee confidence, packaging structure and menu clarity with an invitation to curate and play.

Campaign line: Great collections. Ready to play. Product signature: Well kept. Ready to play. Supporting copy names the preservation and selection work.

08 / VOICE AND PRODUCT RULES

BOLD ABOUT PLAY. PRECISE ABOUT FILES.

Speak with enthusiasm in campaigns and exactness in the workflow. Name the action, explain the result and make uncertainty visible.

TERM	MEANING
Source set	Preserved files, variants, provenance and verification records.
Play library	A derived selection for a device, purpose or preference.
Profile	Region, language, revision, compatibility and inclusion rules.
1G1R	One game, one chosen release; retain its required files.

PRODUCT COPY

3 files need review.

No reference match found. Inspect the details before selecting.

COMPLETION

Your library is built.

620 games ready for export.
Source files unchanged.

For MAME selections, retain required parent data, BIOS, device sets and CHDs. One selected game can need several files. Verification is a reference match, not a launch test.

MAME REFERENCE: docs.mamedev.org/usingmame/aboutromsets.html

09 / RETRO, IN MEASURED DOSES

ARCADE. CONSOLE. HANDHELD. BEYOND.

Build on the shared language of choosing a game. Borrow atmosphere from each format while keeping one recognizable identity.

01 / ARCADE

Marquee confidence

Bold title hierarchy, a visible cursor and punchy color. MAME belongs in the core scope.

02 / CONSOLE

Packaging structure

Framed panels, clear labels and a strong wordmark. No borrowed platform logos or seals.

03 / HANDHELD

Menu economy

Compact rhythm, quick scanning and clear states. Readability remains the common thread.

PIXEL ACCENT / OCCASIONAL

READY

Original 5 x 7 grid lettering.
Short label, generous space.

PIXELS: A SMALL ACCENT

Use one short pixel label or tiny motif per campaign. Keep wordmarks, navigation, game titles, paths and tables in smooth type.

GRADIENTS: CAMPAIGNS ONLY

Optional cobalt-to-violet on SELECT, with TITLE and the emblem solid blue. Use instead of the multicolor mark; never stack both effects.

The theme is game selection across systems. No single console, cabinet or era owns the brand.
